THE FIRM OF KARL F ROSS 5676 RIVERDALE AVENUE PO BOX 900 RIVERDALE (BRONX), NY 10471-0900			EXAMINER AHMED, AAMER S	
			ART UNIT 3763	PAPER NUMBER

DATE MAILED: 09/30/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/821,253

Applicant(s)

VETTER ET AL.

Examiner

Aamer S. Ahmed

Art Unit

3763

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) 5-7 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☒ Claim(s) 2 and 4 is/are objected to.
- 8) ☒ Claim(s) 1-7 are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of claims 1-4 in the reply filed on 08/10/2005 is acknowledged. The traversal is on the ground(s) that method claim 5 is of the same scope as claim 1. This is not found persuasive because a materially different process can make the apparatus.

The requirement is still deemed proper and is therefore made FINAL.

Specification

The disclosure is objected to because of the following informalities: on page 2 line 8, it is suggested that the term "of" be inserted between the terms "method" and "manufacture".

Appropriate correction is required.

Claims 2 and 4 are objected to because of the following informalities: the "inner cap" referred to claims 1 is referred to as the "inner cup". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Bergstresser et al U.S. Patent Number 5,447,500. Bergstrasser et al ('500) discloses a hypodermic syringe comprising a hollow body adapted to hold a liquid and having an axially outwardly open end; an inner cap (26) fitted over the body end (12); an axially extending needle

Art Unit: 3763

(22) seated in the inner cap (26) and having an outer point projecting axially outward from the inner cap (26) and an inner point projecting axially inward from the inner cap (26) toward the body (12). A washer (see figure 6) between the inner cap and the body end (12), having a central hole (see figure 6) into which the inner point of the needle (22) engages, and provided with a membrane (see figure 6) closing the hole (see figure 6) and spaced axially inward from the inner point; an outer cap (30) fittable over the inner cap (26) and needle (22); a clamp ring (see figure 6) engageable around the inner cap (26); a frangible web (see figure 6) connecting the ring (see figure 6) to the outer cap (30); and interengaging formations on the ring (see figure 6) and on the inner cap (26) for releasably retaining the outer cap (30) in an outer position spaced axially outward of the body (12) and in which an interior of the outer cap (30) is open to the exterior and an inner position spaced axially closely to the body and in which the interior of the outer cap (30) is not open to the exterior (see figure 6). Furthermore, Bergstresser et al ('500) discloses that the device comprises a liner cup (see figure 6) inside the outer cap (30), receiving the outer point of the needle (22), and clamped in the inner position between the outer cap (30) and the inner cap (26); and wherein the inner cap (26) is formed with a central outwardly extending projection (see figure 6) from which the needle (22) extends axially outward and that fits snugly in the liner cup (see figure 6) in the inner position.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bergstresser et al ('500) in view of Kuracina et al U.S. Patent Number 5,879,337. Bergstresser et al ('500) discloses the syringe device as described above in reference to claims 1, 2, and 4. Bergstresser et al ('500) fails to disclose that the liner cup is of rubber. Kuracina et al ('337) describes a similar device in which the liner cup (72) is made of rubber (see figure 79 and col. 27 line). It would have been obvious to one having ordinary skill in the art at the time of invention by the applicant to modify the syringe device of Bergstresser et al ('500) by making the liner cup of rubber as taught by Kuracina et al ('337) in order to prevent leakage from the needle (Kuracina '337 col. 27 line 28).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
